ACT NOW

The World Must Reject Communism Because It Brings:

1. Destruction of Personal Freedom

- Communism replaces individual liberty with government control, surveillance, censorship, and fear.
- NYC's tradition of free speech, diverse views, and open social life would be suppressed.

2. Economic Disaster and Poverty

- Communist control of property and business leads to economic collapse and generalized poverty.
- Free markets, private entrepreneurship, and consumer choice—core to NYC's vitality—would be lost.

3. Moral Erosion and War on Traditional Values

- Communist regimes attack morality, faith, and traditional values—destroying families, undermining faith, especially Christianity, and abolishing ethical standards.

4. Loss of Diversity and Innovation

- Centralized planning and thought control suffocate creativity, entrepreneurship, and innovation—the lifeblood of NYC's global prominence.

5. Corruption, Government Overreach, and Violence

- Communism justifies state violence and mass repression ("the end justifies the means");
- Past lessons led to imprisonment, exile, intimidation, and mass murder.
